Professional Summary

Frontend Developer with 3.4+ years of experience building responsive, user-friendly, and high-performing web applications. Proven track record in React.js, Vue.js, Next.js, and modern frontend tools. Adept at optimizing performance, implementing reusable components, and delivering features that scale to millions of users. Skilled in mentoring, Agile collaboration, and driving measurable improvements in product performance and user experience.

Core Skills

- Frontend: React.js, Vue.js, Next.js, Nuxt.js, Redux, Vuex, Context API
- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS, Tailwind CSS
- Tools & Build Systems: Webpack, Vite, Babel, NPM, Yarn
- UI/UX: Responsive Design, Material UI, Ant Design, Bootstrap, Figma
- Testing: Jest, React Testing Library, Cypress
- Version Control & CI/CD: Git, GitHub/GitLab, Bitbucket, Azure
- Other: REST APIs, GraphQL, Agile/Scrum, Performance Optimization

Professional Experience

Senior Frontend Developer

Glasier Inc, Ahmedabad | Nov 2024 – July 2025

- Developed and maintained scalable web applications using React.js, Next.js, and TypeScript, delivering features to over 1M active users.
- Built 30+ reusable UI components with Material UI and Tailwind CSS, reducing feature development time by 25%.
- Improved application load speed by 40% (6s → 3.5s) through lazy loading, code splitting, and caching strategies.
- Integrated REST APIs and GraphQL to serve real-time data, reducing API response time by 20%.
- Mentored 4 junior developers, leading to a 15% decrease in bug rate across projects.
- Collaborated with backend and design teams in Agile sprints, achieving a 95% on-time feature delivery rate.

Frontend Developer

Shiv Infotech, Ahmedabad | Jan 2022 – July 2024

- Developed interactive dashboards and SPAs using Vue.js and Vuex, increasing customer engagement by 30%.
- Converted 20+ Figma/Sketch designs into fully responsive, cross-browser-compatible applications.
- Optimized page load time from 5s to 2.8s using Webpack optimizations and code minification.
- Implemented automated testing with Jest and Cypress, increasing test coverage to 85%.
- Migrated a legacy jQuery codebase (~50K lines) to Vue.js, cutting maintenance costs by 20%.

Education

Bachelor of Technology (B.Tech) in Computer Science
Gujrat Technological University

Projects

- Crest Connect – Property Management System: A web and mobile-based platform for managing properties, users, shifts, and employee requests. Admins can monitor attendance, approve leaves, reimbursements, overtime, and uniform requests. Users access a mobile app to mark attendance, apply for leave, submit requests, and view shift schedules, enabling smooth communication between admins and field staff.
- Gravitrain – Fitness Training Platform: A web and mobile platform for Admins, Trainers, and Trainees. Trainers create profiles, add training details, and schedule sessions. Trainees can search trainers, request sessions, and communicate via an inbuilt chat. Includes admin modules for payment settlements and coupon management.
- VShips Management: A ship management platform built with Microfrontend architecture in Next.js. It integrates modules for User Management (role-based access), Contacts, Reports, and Apps management. This modular design ensures scalability, maintainability, and smooth integration across the ecosystem.
